Hi All,
I need help!
I am a womens wear designer with a retail outlet very interested in stocking my collection in their highly successful boutique..
They want to use their label.
If they were financing the production and I were to oversee design, pattern cutting and production what percentage would each party charge?
(They don't want to get a solicitor involved!)
I know there are no hard and fast rules but it's always good to have info to hand!
